NODO FLEX

NODO CÓRDOBA LOGISTICS PARK

National Route 19, Km
13
Córdoba, Argentina

NODO IS A **LOGISTICS PARK**
DESIGNED TO TRANSFORM
INDUSTRY AND COMMERCE IN THE REGION.

LOCATION

Strategically located in Córdoba city, on **National Highway 19, Km 13**, near the ring road, it offers fast access and modern infrastructure with comprehensive services.

The project includes 14 warehouses designed to meet a range of logistics, commercial and corporate needs. Every space is connected through a system designed to optimize functionality and foster business growth.

INFRASTRUCTURE

- Water supply
- Fiber optics
- Concrete-paved streets
- Multiple entrances
- Underground power grid
- Sewer connections
- Curb & gutter

KEY SERVICES

- 24-hour security
- Management services
- Coworking center
- Food service
- Access control

PARK ECOSYSTEM

THE VALUE **OF A SHARED PARK**

Strategic sectors sharing infrastructure and scale on a single site.

- **Shared site services:** Common infrastructure that reduces fixed operating costs.
- **Security and management:** 24-hour surveillance and comprehensive park management by ZLT.
- **Synergies between operators**: Proximity to top-tier companies and complementary industries.
- **Lower perceived risk**: An established environment that eases corporate approval.
- **Lower upfront CAPEX:** Access top-tier infrastructure with no investment or prior construction of your own.
- **Corporate image and AAA compliance:** Streamlines internal audits and approval by headquarters with international standards.
- **Scalability without relocation:** Expand or reduce your space as demand changes, without disrupting operations or moving.

*The final mix of operators will be confirmed as leasing progresses.

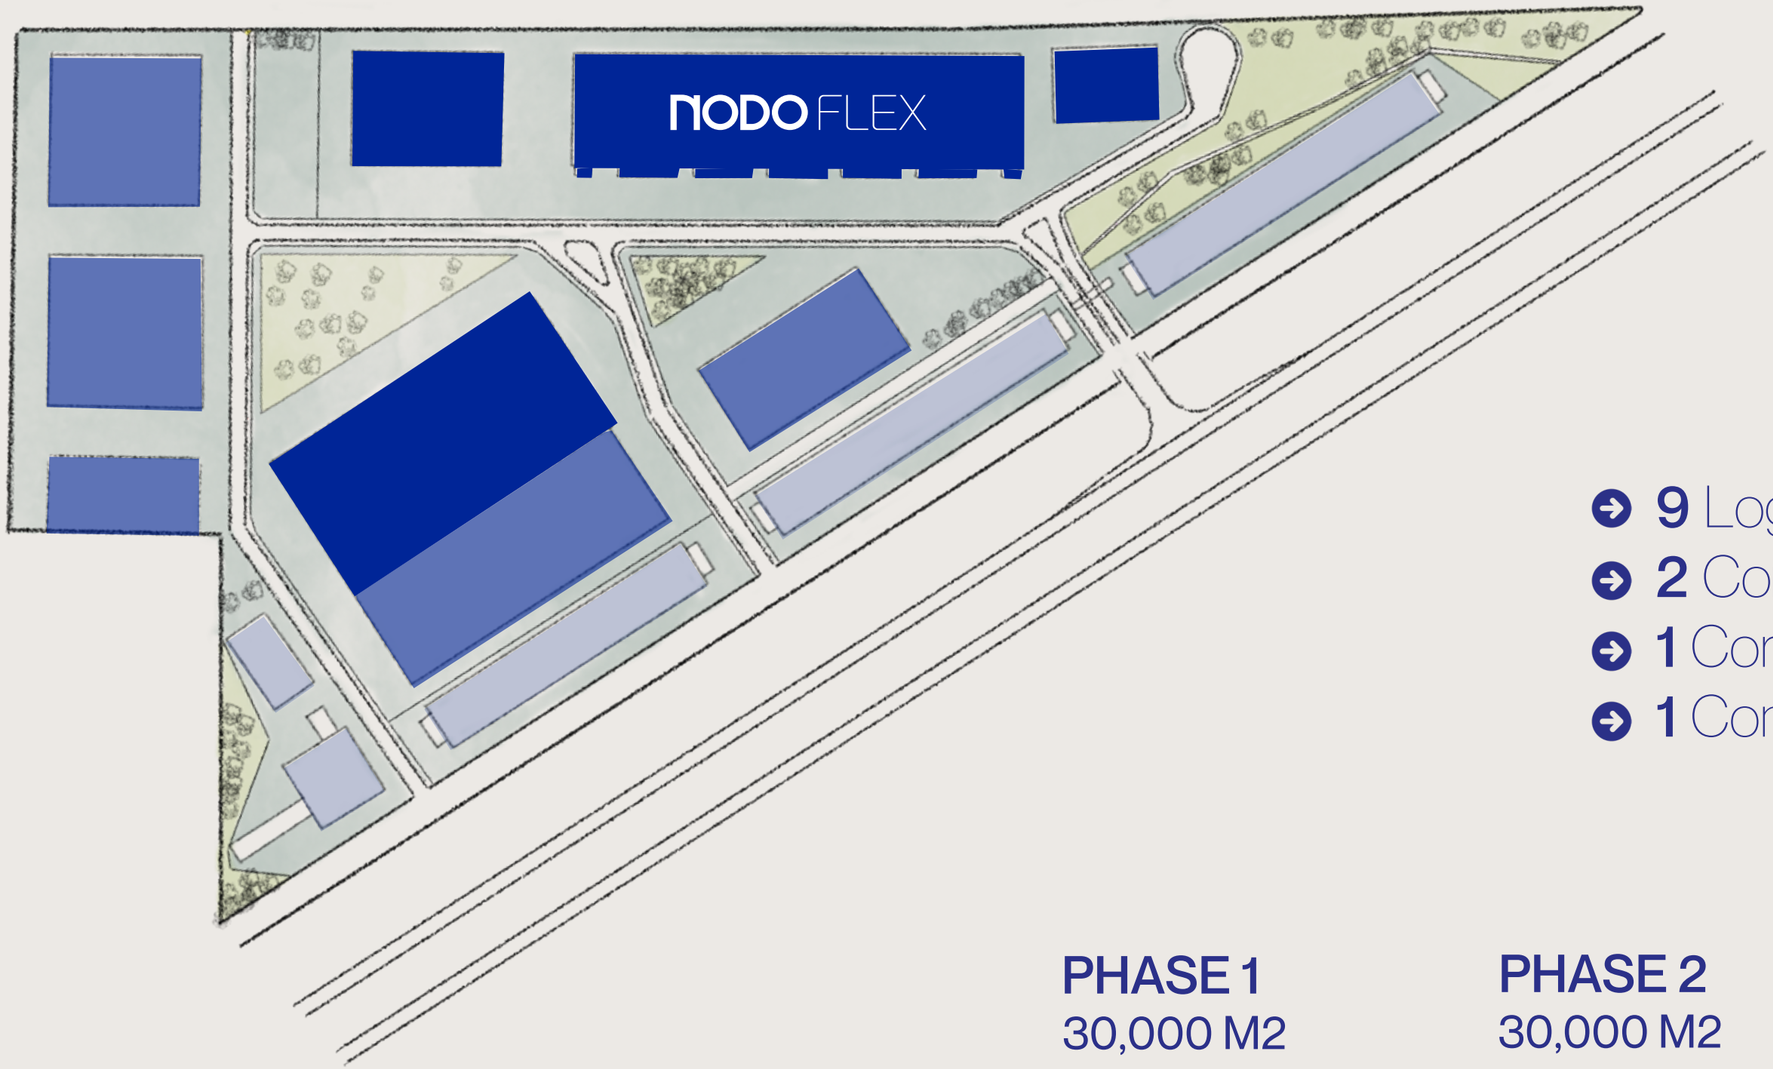

NODO FLEX

14,400 m²

TOTAL WAREHOUSE AREA.

NODO FLEX LOCATION WITHIN THE PARK

- **9** Logistics warehouses
- **2** Commercial warehouses
- **1** Corporate building
- **1** Convention center

PHASE 1
30,000 M2

PHASE 2
30,000 M2

PHASE 3
17,000 M2

WHY OPERATE AT **NODO FLEX**?

Nodo Flex is a **divisible Class AAA 14,400 m2** logistics warehouse, designed for top-tier companies that require modern, efficient and scalable infrastructure for their distribution, storage and logistics operations in central Argentina.

Its strategic location on **National Highway 19, Km 13**, minutes from the Córdoba city ring road, ensures direct connection to the main regional distribution routes: RN9, RN36 and the Rosario–Córdoba Highway.

Corporate leases are managed end-to-end by ZLT, with long terms and full support so your company can operate with efficiency, contractual security and guaranteed continuity.

A WAREHOUSE THAT **ADAPTS TO EVERY OPERATOR**

Nodo Flex is a **divisible** warehouse that allows several logistics companies to operate at the same time, according to their needs.

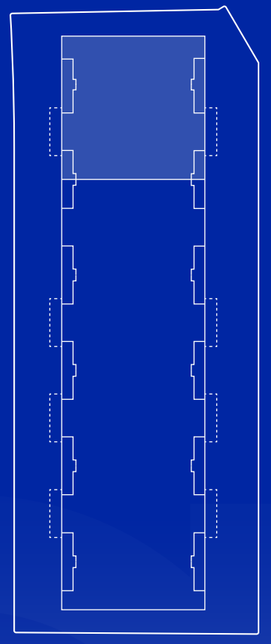

A **premium** warehouse, designed for leading logistics companies with high operational demand.

FLEXIBILITY THAT ADAPTS TO YOUR BUSINESS

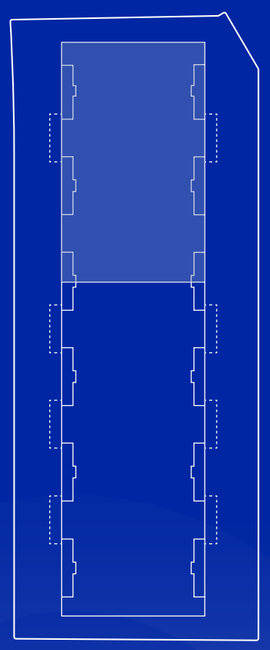

NODO FLEX is designed to adapt to the specific needs of each operation. The warehouse can be subdivided into modules, offering options for companies of different sizes and sectors.

From storage and distribution to light manufacturing, its flexible design ensures a space that evolves with your business.

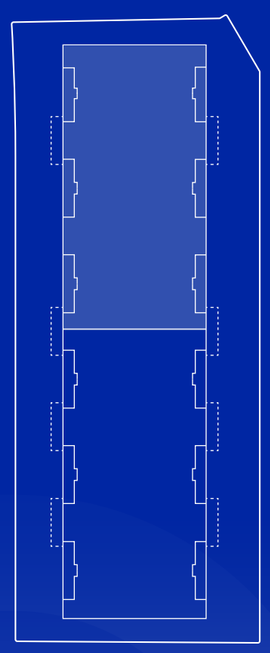

3,600m2

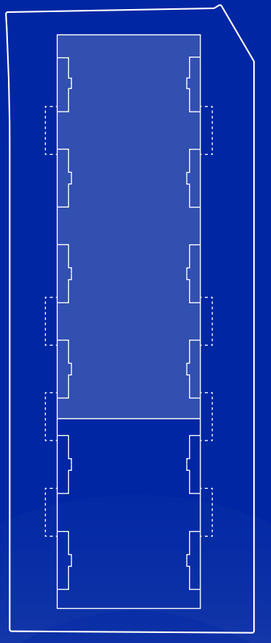

6,000m2

7,200m2

9,600m2

*Flexible spaces are illustrative and will be adapted to each operator’s needs.

SPEC SHEET

KEY **NUMBERS**

The data your engineering team needs to assess the operation.

TOTAL AREA

14,400 m²

With flexible modular capacity

Adaptable.

MODULE SIZE

≥ 3,600 m²

Structure ready for subdivision.

Scalable and adaptable.

CLEAR LENGTH

59.16 m

Continuous operating area.

Efficient logistics flow.

CLEAR HEIGHT

10.24 – 12 m

Interior clearance under beam.

Suitable for high racking and modern logistics (5 to 7 pallet levels). Capacity subject to layout, rack type and logistics operation.

CLEAR WIDTH

20 m

No structural obstructions.

Ideal for circulation and flexible layouts.

FLOOR LOAD CAPACITY

5 ton/m²

Troweled interior floor - 10 x 10 m slabs. Microfiber + mesh.

Fewer joints → greater durability.

WAREHOUSE TECHNICAL SPECIFICATIONS:

- ISO 9001-certified steel structure with 20 m spans and solid-web columns and beams.
- Minimum clear height of 10.24 m and maximum of 12 m
- Troweled concrete floors with laser-cut joints.
- 40 mm PIR SKIN exterior panels with pre-painted sheet metal.
- U45 metal roofing with 50 mm glass wool thermal insulation.
- Aluminum windows with double glazing
- Industrial sectional access doors.
- LED lighting.
- Large troweled-concrete maneuvering yard.
- Access to the park's services and infrastructure.

LEASING PROCESS

FROM INQUIRY **TO KEYS**

A clear, predictable path, with estimated timelines at each stage.

01

Initial inquiry

Meeting to understand your operation and space requirements.

02

Proposal & module

Choose your module and receive a tailored commercial proposal.

03

Letter of intent

LOI signed to reserve the module and set the terms.

04

Corporate lease

Signing of the comprehensive lease managed by ZLT.

05

Fit-out

Period to fit out the warehouse for your operation.

06

Handover & operation

Key handover and start of operations.

*Estimated timelines; may vary depending on fit-out complexity and module availability.

PERMITTED ACTIVITIES

- Storage and distribution of goods
- Last-mile logistics and e-commerce
- Cross-docking and freight consolidation
- Picking, packing, labeling and value-added services
- Bonded warehousing and customs operations
- Pharmaceutical and consumer goods distribution
- Cold-chain logistics with specific permits
- Storage of non-hazardous materials
- Administrative offices related to the operation
- Light maintenance of own fleet
- Vehicle loading and unloading operations
- Activities compatible with current industrial zoning
