VALUE PROPOSITION

Large-scale mining relies on an extensive value chain that goes well beyond extraction —logistics, storage, maintenance, supplies and technical services— which today operates in a scattered, informal way, with a direct impact on costs and lead times. An industrial and logistics park designed for the sector meets this structural demand: it brings suppliers together on a single site, with infrastructure and services that meet industry standards, enabling a supply chain that is more efficient, predictable and close to operations.

STRATEGIC LOCATION

In mining logistics, location is a decisive competitive factor. The project offers proximity to the mining operations area, about 2 hours from Calingasta and Rodeo, with direct access to National Route 20 and close to San Juan Airport, optimizing distances, costs and response times. This configuration makes it not merely developed land, but an operational logistics asset.

Service base · Mining project · Road · Logistics link*

SERVICE BASES

PIM
Parque Industrial Minero

NORTH CORRIDOR

Jáchal · Iglesia · Rodeo

Connection to Vicuña and Veladero.

SOUTH / WEST CORRIDOR

Calingasta · Barreal · Cañada Honda

Support for Los Azules and El Pachón.

REFERENCE DISTANCES

City to Andean bases: ≈ 200 km*

Bases to mining projects: ≈ 200 km*

San Juan–Cañada Honda: ≈ 61 km

PARK SURROUNDINGS

*Reference distances per leg: city–bases and bases–projects; they vary by destination and route. Dotted links indicate logistics relationships, not mining roads.

REGIONAL DEVELOPMENT

By having the supplier chain set up and pay taxes locally, the value generated by mining stays in the region: skilled jobs, stronger SMEs, a broader tax base and a consolidated productive ecosystem that outlasts the life cycle of each mine, positioning the area as a mining services hub with its own industrial identity.

PARTNERS

The addition of a 4,370 m² Mercado Libre logistics warehouse serves as an anchor operator and market endorsement: it validates the quality of the development, increases logistics flows, attracts new companies and confirms the park's role as a multipurpose platform, integrating the mining supply chain with the distribution infrastructure the region needs.
