SERVICE CENTER

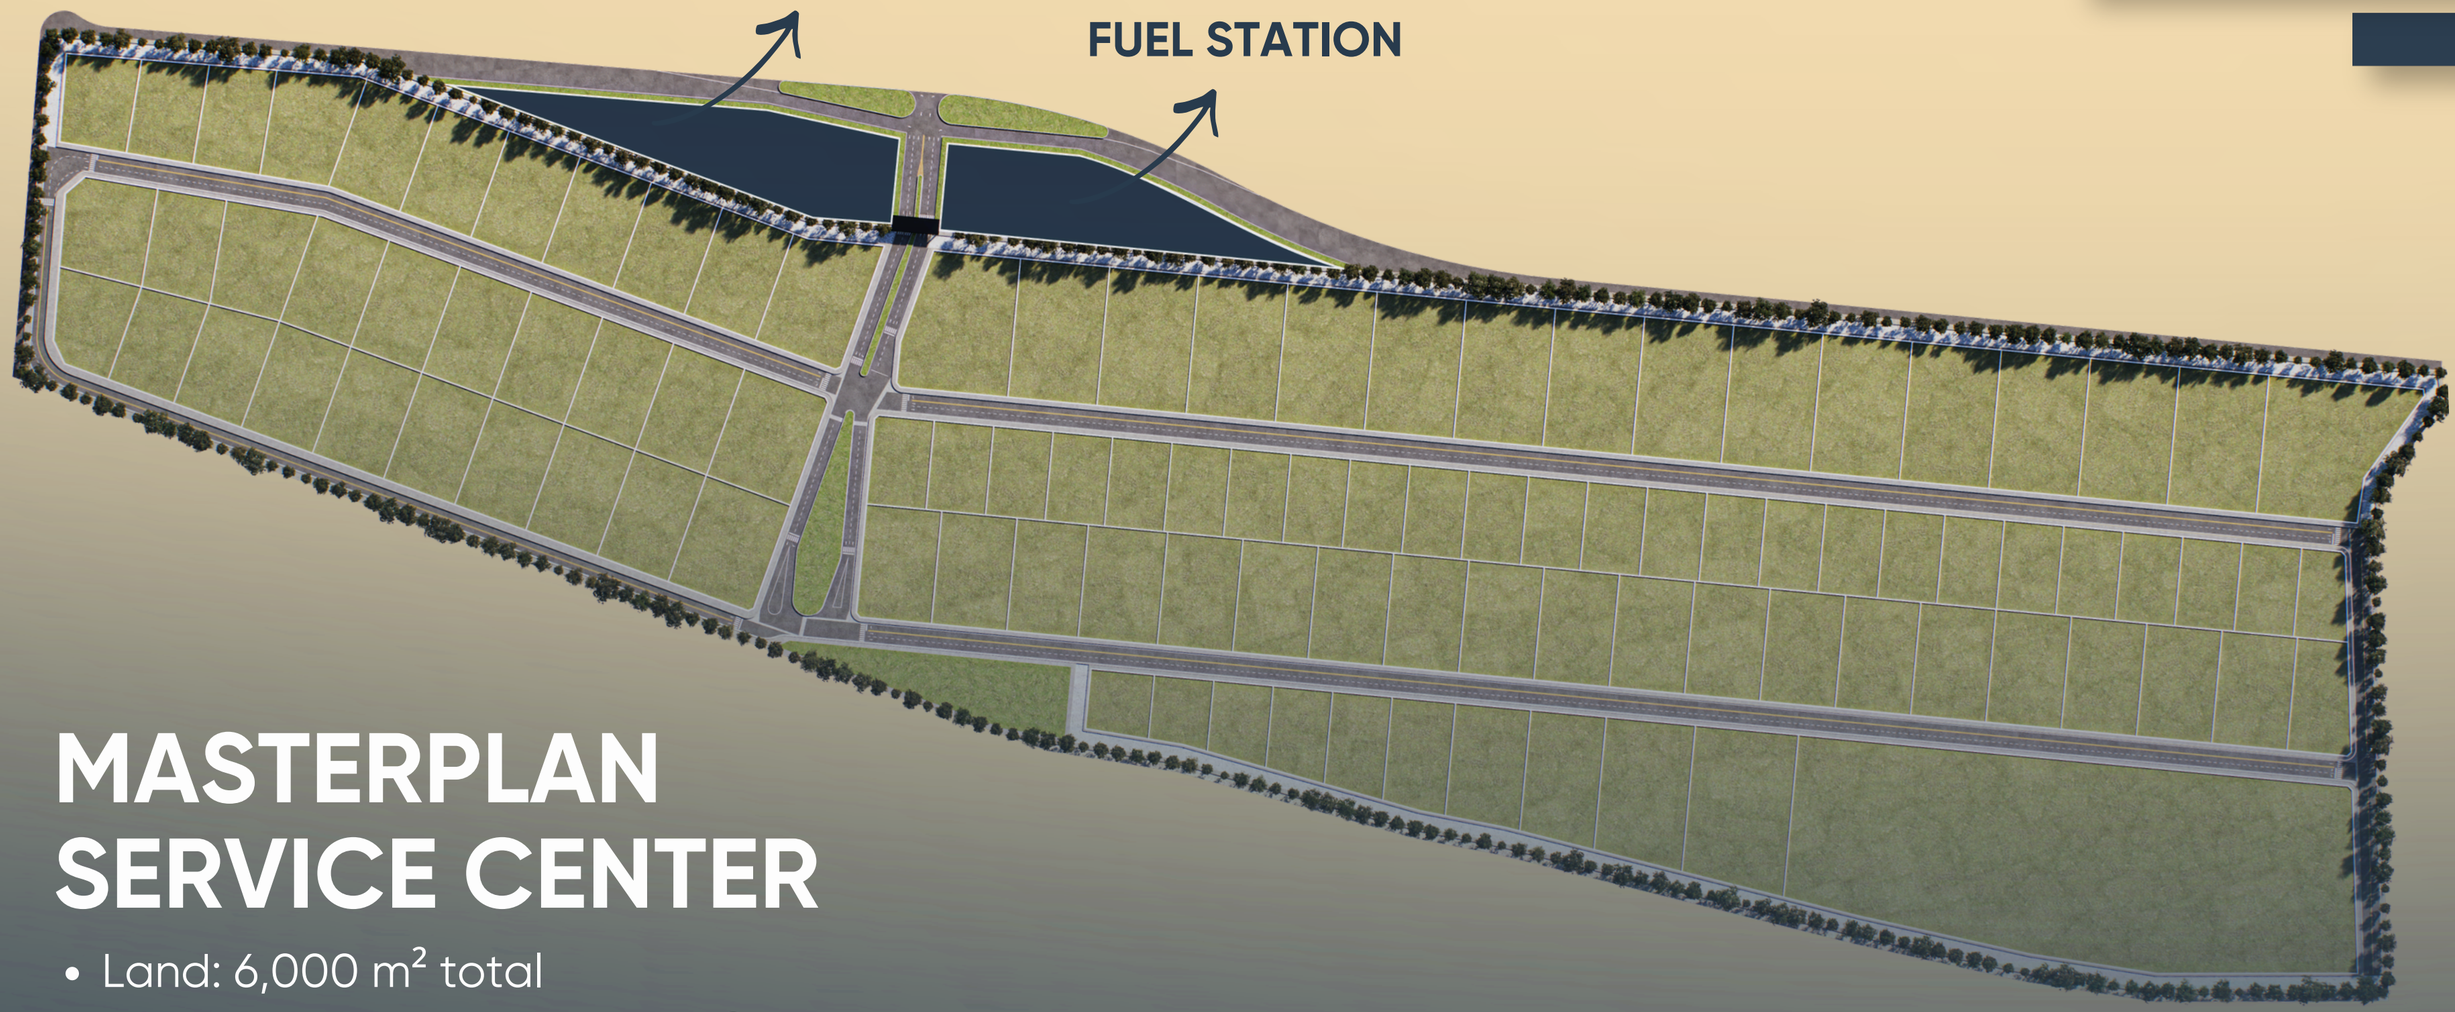
A growing region needs more than industrial infrastructure. It needs a place that keeps activity going.

Añelo is the operational epicenter of Vaca Muerta. Thousands of professionals and companies converge here every day, with a demand for services the local market has yet to meet.
The PIVM Service Center was created to fill that gap. It combines a **retail zone** with its own parking and **a fuel station with a travel stop**, located on the bypass linking Route 7 and Route 17 — *the most active logistics corridor in the region*.

A project that not only supports the Vaca Muerta Industrial Park, but completes it.

IN THE HEART OF VACA MUERTA

Añelo, Neuquén, Route 17, Km 5.



MASTERPLAN SERVICE CENTER

- Land: 6,000 m^2 total
- Covered retail area: 3,000 m^2

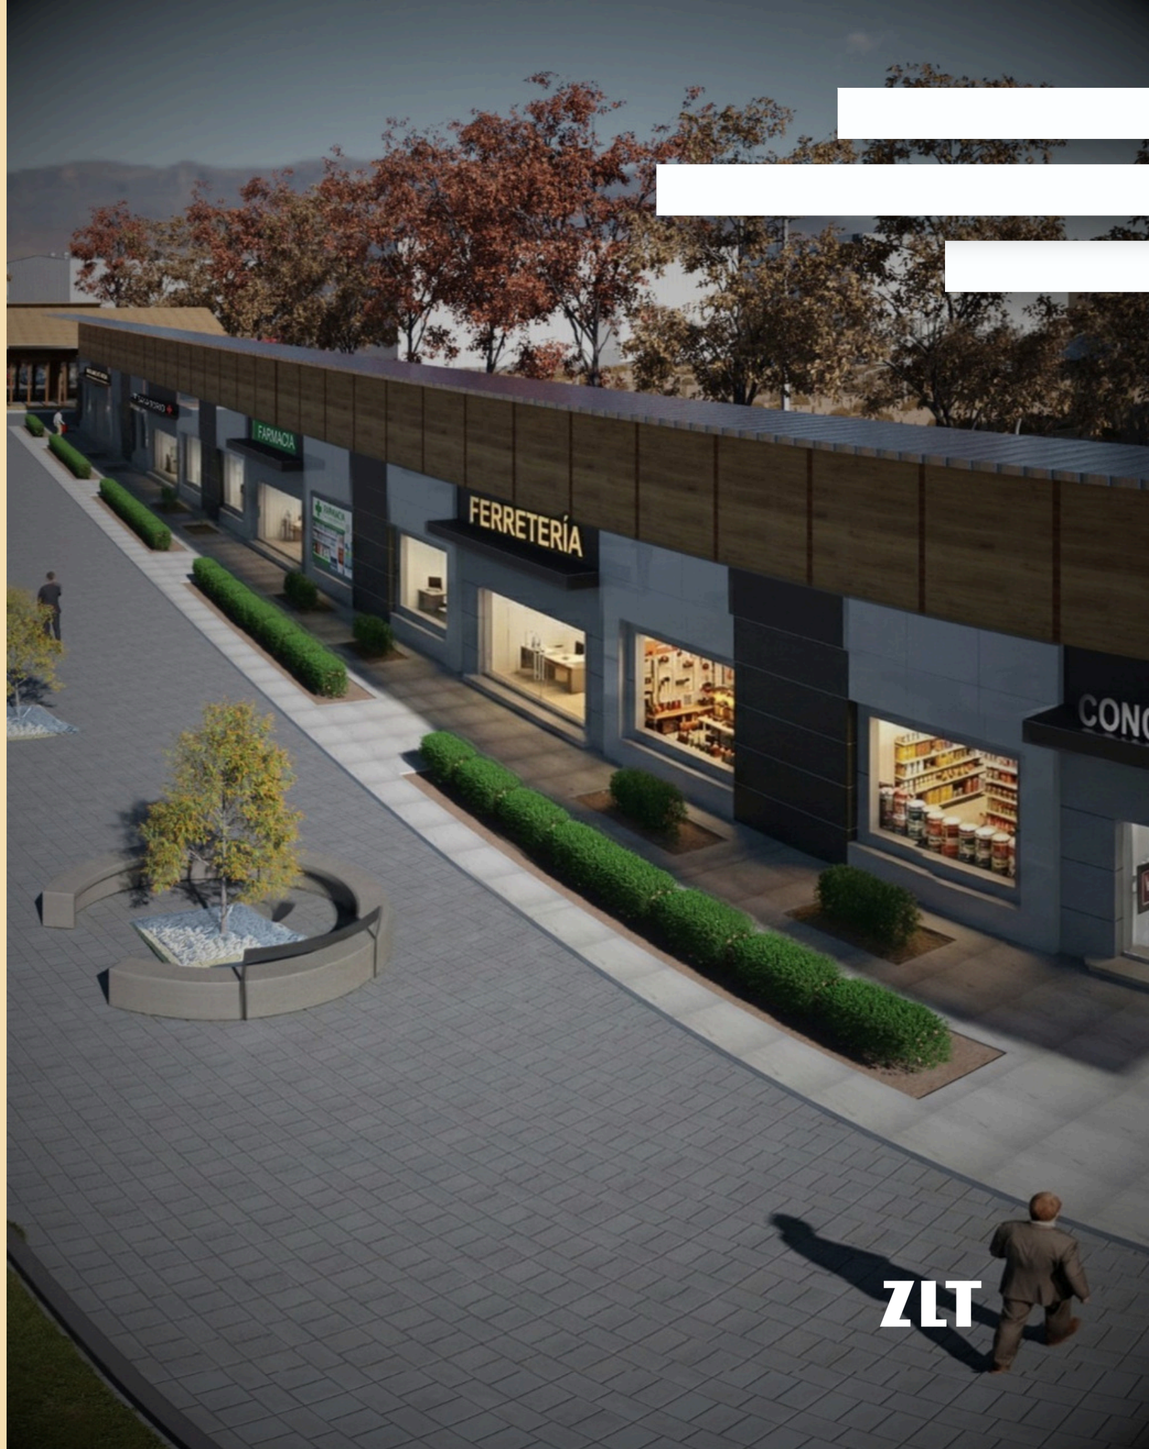
ECOSYSTEM

Setting up in the **Service Center** retail area is not simply choosing a unit: it means securing a strategic position at the operational heart of Vaca Muerta.

With direct frontage on the bypass linking Route 7 and Route 17, every brand operating there will enjoy immediate visibility on one of the region's busiest industrial corridors. Its location **just 1 km from Loma Campana**, YPF's main oil field, further enhances its commercial and logistics value.

The real differentiator is the surrounding ecosystem: 103 active lots, **more than 400 companies based in Añelo**, and thousands of professionals with strong purchasing power moving through the catchment area every day. This is real, concentrated, sustained demand – with no need to create it from scratch.

In a basin where **less than 10%** has been developed so far, and which is projected to see outstanding growth over the next 50 years, locating in the Service Center means getting ahead of Vaca Muerta's future development and being part of its expansion from a privileged position.



SUGGESTED USES

An ecosystem that adds value to the region and to the companies within it.

PARQUE INDUSTRIAL VACA MUERTA
SERVICE CENTER

PRODUCTS

- Machinery and work equipment
- Supermarket
- Pharmacy
- Quick lube
- Tire shop

With direct frontage on the bypass and thousands of people passing through daily, retailers tap into constant pass-by demand: convenience and immediate-need purchases, without having to generate traffic. Being at the park entrance means being the first and last stop for everyone coming in and out.

SERVICES

- Insurance
- Primary care clinic
- Logistics/Courier
- Food & dining

Service companies find their clients already in place: 400+ companies and thousands of professionals operating in the area year-round. Physical proximity to the productive ecosystem translates into operational closeness, responsiveness, and an institutional presence right where activity is concentrated.

FUEL STATION

FUEL STATION

Traffic on the oil route never stops. Trucks, corporate fleets, and field vehicles travel this corridor around the clock, without service infrastructure to match that demand.

The fuel station with travel stop at PIVM sits at the exact point where that flow converges: the intersection of the bypass and the park entrance. A must-pass location that becomes a landmark for the entire region — not only for those operating in the park, but for all the heavy and industrial traffic connecting Añelo with the rest of the basin.
